Crossharbour Walking Catchments and Straight-Line Reference

Network travel-time contours | Dashed circle: 2.4 km diameter based on 4.8 km/h × 15 minutes

Routing: reviewed OSMnx pedestrian graph, origins A/B, multi-source shortest paths, partial-edge handling, 4.8 km/h. The surface uses ordinary-Delaunay interpolation and is not a constrained-Delaunay implementation. School markers are cleaned coordinates, not verified entrances.
